RE: Algoma Street & Colonization Road Rehabilitation – Phase II

TULLOCH Engineering Inc. has been retained by the Town of Spanish to provide Project Management and Site Inspection for Phase II of the Algoma Street & Colonization Road Rehabilitation Project, being constructed by Mailloux Construction. In general, the work will include ditching and culvert improvements, reconstruction of the cul-de-sac and resurfacing of the roadway. Construction limits will be from Public Road, southerly, up to and including the cul-de-sac. It is anticipated that construction activities will begin the week of September 12th, with the intent to complete all work by October 21st, 2022.

During construction, sections of Colonization Road will be closed to vehicular traffic and vehicle access may be limited to your residence for short durations of time during construction. TULLOCH will have on-site representation throughout the duration of construction and you can contact our site inspector, Mr. Pat King, 705-842-3372 if you require additional information. Pedestrian access will be impacted, but not restricted. We will provide additional information on impacts to traffic, garbage collection and other service interruptions as it becomes available.

Hopefully, the positive end result will make the inconvenience of local construction worthwhile and we appreciate your patience in this regard. Again, Mailloux Construction will begin onsite the week of September 12th and we will provide additional information as soon as possible. If you have any specific needs related to the accessibility limitations, please contact Mr. King at the number shown above.

Yours truly,
TULLOCH
